Title of Project:	Accountability and Market reform failures
Type of Product (e.g., Book, Paper, Documentary Film, Serial Article):	Article, possibly book
Précis of 100 Words or Less:	<p>Economists have recently underscored that the failure of market reforms in producing sustained growth in emerging markets is the result of the International Monetary Fund's poor advice as well as erroneous macroeconomic policies of domestic decision-makers. This paper proposes a complementary hypothesis. If market reforms are enacted in a political system with weak accountability institutions, then we should expect the executive to manipulate such reforms in order to pursue old-fashioned practices like collusion between government and business, political patronage, and corruption. This, in turn, ends up depriving a given economy of potential advantages had the reforms promoted true competition rather than reallocating monopolistic rents while squandering a large amount of resources.</p>
Start Date:	Summer 2001
Projected Completion Date:	In progress
Presentation or Publication Date:	World Politics no. 2 April 2003
Presentation or Publication Venue:	
Original Language:	English
Projected Date of Availability in English:	See above

Relation to Other Efforts, Follow-on Projects (If Any):	This is a continuation of a paper published in 1996 in the Review of International Political Economy in the Spring of 1996
Available in Hardcopy or Electronically (Y/N):	It's published in World Politics by Johns Hopkins U. Press
